Plans Rapidly Shaping For Bang Up Fair

Attractions Will Surpass Any Previous Show Ever Seen Here; Steer Weight Guessing Competition on Midway

Arrangements for making the Lacombe Fair one of the finest yet held are rapidly taking shape, and at a meeting of the Fair Board, held in the office of Secretary D. F. Chisholm on Monday night, various reports were given, proving that the Fair will be everything claimed for it this year.

In addition to the published prize list and those sent out, S. and W. Blakely are offering a special prize of \$5, \$3 and \$2 for the best colt from their Belgian stallion, "Huskey Max."

Everyone was enthusiastic over the attractions which have been booked, something entirely new for any Class "B" or "C" fair, giving the advantage of the splendidly equipped Central Alberta Pavilion, erected during the past year, the Fair Board is able to guarantee its patrons the advertised attractions "rain or shine."

Splendid Revue Coming
"Harvey Hatcher," the producer of "Harvey Moon Revue," which will be presented at the fair, is a past master at putting on shows of this type, and patrons are sure of their money's worth and then some. He has successfully produced shows all over the west, and in Regina was booked by the Rotary Club to produce their "Minstrel Show" for five successive years. The Calgary Rotary Club booked him to put on an outdoor "Revue" at the Exhibition Grounds last year, which drew an attendance of over 9000 people at each performance, shattering all records.

In addition to the regular Midway, a novel attraction will be a "Live Steer Weight Guessing Competition" at 10 cents a guess. The person guessing the correct or nearest correct weight will receive 10 per cent of the total, which will no doubt be in the neighborhood of \$25.

An additional drawing card will be the "All-Star" baseball game, between Ponoka and Lacombe, for which no charge for admission will be made, the directors having decided to include this with "Free admission to the grounds."

The "Intelligent" "Thoroughbred" race, which will also give for the big draw at night, which will be interspersed with a floor show of the afternoon performances. So, if you are looking for real enjoyment, don't fail to visit the Lacombe Fair next Labor Day, Sept. 7.

Aspen Beach

ASPEN BEACH.—Sunday games created a good deal of interest. The Gull Lake girls started with a game against the Old-Timers, all men, beating them by a score of 15 to 12. Jackfish Lake trimmed Sunny Crest to the tune of 23 to 10. The Gull Lake boys won a decided victory over the Spruceville team, winning the game by 18 to 12.

Mr. and Mrs. Arthur Finch and son Leslie of Ponoka are spending a month at the beach.

Mr. and Mrs. G. McCullough and daughters are holidaying at Aspen Beach.

Mr. and Mrs. W. Wilson and children spent a few days at the Beach last week.

Gives Musical Entertainments
Mr. and Mrs. J. W. Elliott and daughters are spending their holidays at the Beach. Mr. Elliott has an electrical gramophone with amplifier and has treated us to some music by the best talent on the continent. He has furnished music for dances throughout the whole province with great success and proposes to give us a dance on Saturday night.

Mrs. P. W. Wood and daughters returned to Edmonton on Wednesday after spending over a month at the Beach.

Mr. R. E. Anley, M.J.A. for Leduc, and Mrs. Anley, are holidaying at the Lake.

Mr. and Mrs. C. P. Andrews of Calgary are holidaying here.

Mr. John Blue, secretary of the Edmonton Chamber of Commerce and Mrs. Blue, spent last week-end at the Lake.

Mr. and Mrs. H. R. Woellner and family and Miss Lilian Berglund of Spokane, Wash., visited Mr. Woellner's brothers, Ott and Emil Woellner of Aspen Beach, a few days last week. They reported having had a delightful trip so far, and are greatly impressed with the good treatment of tourists in Canada and anticipated they would be back to spend a month next year.

This Week's Thought

It is not the position, but the disposition that makes life worth living.

CHURCH HALL FUND CLIMBS STEADILY

More Donations Needed for Fund to Reach Desired Objective

The subscription list opened for renovating the Church Hall received another nice boost during the past week, but more money is needed before the desired objective is reached.

Repairs on the foundation of the Church Hall and the lowering of the chimney has been completed at a total cost of \$250. It is the desire of the Ladies' Guild to have broken places in the plaster mended, the doors and windows repaired and the floor given a coat of paint or oil, before the hall is opened for meetings in September. It is estimated the cost of these further repairs will be at least \$50, or a total of \$300.

Including last week's subscriptions \$150 has now been paid toward this work. If everyone will help even to the small extent of \$1.00, the balance can easily be raised before the end of this month. Larger donations, of course, will be most welcome.

It is believed that every person, both young and old, realizes the advantages the use of this building has been to the entire community and will want to assist insofar as they can. Send your donations to the Western Globe.

Many thanks to those whose names appeared on last week's subscription list. Who will help build up the fund this coming week?

Receives Shipment From Old Country

Bill Swanson has just received a large consignment of Riley's English Toffee, which came direct from the Old Country via Port Churchill and the Hudson Bay Railway route. It is understood that this is the first shipment received in Alberta this year over the new route.

First Wheat Not Expected For Week

The first delivery of grain threshed and harvested this year in Lacombe district is not expected before another week, claimed Roy Osborne of the Alberta Pacific elevator here. There has been no sign or reason for expecting delivery of grain quicker and it is expected that the recent rainfall will hold up harvesting for a few days.

POSTMASTER AT CHIGWELL DIES

George Garlick, postmaster of Chigwell, died suddenly and was buried last Monday; his funeral service being held in St. Cyprian's Church. His widow and one daughter survive him.

Another Protest Game in Play-Offs

Lacombe Juniors and Stettler Both Win Home Games; One Is Protested
Nobody can say that there hasn't been plenty of fire in this junior playdown. The final game, which took place in Stettler on Tuesday night, finished at the end of the eighth inning with the Elks out on the long end of a 7-6 score.

A lengthy dispute arose in the first inning of the game, which was protested by the local team, but was eventually settled by the referee.

The first game of the junior provincial baseball playdowns, which was played here last Monday with the Stettler Elks, was replayed Sunday last, with the home-town Juniors victorious through a sparkling 6-4 victory. The dispute arose over Stettler using an over-thrower, Art Davis, and the game (which the visitors had won 11-9) was ordered to be replayed. The local boys took advantage of the opportunity and by virtue of their win, tied up the five-game series at two victories apiece.

Good Crowd on Hand
Playing before the best local crowd of the season, the players on both teams played heads-up baseball.

The home team took a good lead on their rivals in the first inning, by hitting the hits of Miller, Dillon, and Frizzell, and for free runs. The visitors retaliated in the second with a four-hit ball, scoring twice, and holding the Athletics counterless in their halves of the next two stanzas.

W. G. Sage, who took the 3-4 with a fourth-inning run.

But the locals wouldn't stand for that. In the fifth they crossed two more tallies over the home plate, and just to clinch it, Art Frizzell connected for a long circuit clout two innings later on.

From then on, steady fielding and pitching on the part of the local boys held the Elks to one lone counter in the ninth.

Lineup of Teams

Stettler Elks—Bryan, Friend, Harrison, R. Seaby, D. Seaby, C. Sorenson, Gilbert, Nehwander and Fisher.

Lacombe Junior Athletics—J. Miller, C. Miller, Dillon, A. Frizzell, R. D. Wilson, W. Hoppus, Carter, Jeglum, Gordon.

Score by Innings—
R. Lacombe..... 300 020 100-6
Stettler..... 020 100 061-4
Total..... 320 120 161-10
Hoppus; Nehwander and Friend.
Umpires: A. Penman and H. Teare.

Summary: Struck out by Frizzell 3, by Jeglum 4, by Nehwander 1. Three-base hits: R. Seaby, Gilbert. Home run: Frizzell.

E. D. Cotterell, Gen. Supt. of C.P.R., Visitor in Lacombe

Taking advantage of his visit to Lacombe on Monday, the Board of Trade interviewed E. D. Cotterell, general superintendent of the C.P.R., with the request that the new stream-lined train, now on an experimental tour of the West, stop off at Lacombe for a few hours to enable people of the town and district to see it.

On account of the schedule having been definitely set, Mr. Cotterell regretted that arrangements could not be made. During his trip of inspection here, a change of importance to farmers which was decided by the present grain loading platform to a more convenient location, the work will be commenced immediately.

The provinces of Alberta, Saskatchewan, Manitoba, New Brunswick, Nova Scotia and Prince Edward Island are operating under the Hatchery regulations and producing chicks only from selected blood-tested flocks.

Council Grants \$300 TO Aid Fair

A grant of \$300 to assist the Lacombe Agricultural Society in the best of the fair, was passed at the Town Council meeting held in the Town Hall on Tuesday night.

Stafford Boyd, representing the Agricultural Society, outlined the efforts of the organization and the success attained so far in securing the best of the fair for the Fair this year, which were admittedly outstanding. In addition, free admission to the grounds and baseball game would be a big drawing feature. It was the earnest intention of the board, he said, to put the Fair on its feet, and to make it the finest Class "C" Fair in Alberta.

Mr. Boyd remarked that any surplus that may be created would be used towards building up and improving the present buildings and the Fair grounds, which are at a very depleted condition.

A letter of regret from the Provincial Department of Public Works, received by Mr. Boyd, apologized for the delay in the paving of the main streets of Lacombe but contained no definite date on which the work is to start. The letter stated in part that "there is a possibility that the work cannot be completed this season."

Mr. Boyd, in his report, informed the council that a committee of three, consisting of Mr. Boyd, Mr. Minkler and Mr. Brack, had been appointed to obtain action on the paving of the streets. Councilor Councillor T. Wilks, in his report, informed the council that a committee of three, consisting of Mr. Boyd, Mr. Minkler and Mr. Brack, had been appointed to obtain action on the paving of the streets.

PAVING TO START AT ONCE

Hard surfacing the highway through town and other streets which are ready to be done, will be commenced some time this week, according to definite word received Wednesday morning by Councilor T. Wilks, Minister of Public Works, Edmonton.

Engineers of the department have been instructed to have the hard surfacing equipment brought here from Calgary within the next few days, and proceed with the work at once.

This is good news to the townspeople, some of whom were giving up hope that the work would be completed before next year. As a matter of fact, a letter from the department read at the council meeting on Tuesday night, intimating such a possibility.

Registration for the Alberta basic dividends in Lacombe during the past week have taken place in an office opened for that purpose in the old Grand Theatre building, on Nanton street.

A check-up by the Western Globe on the number registered up to Wednesday night disclosed the information that close to 500 had registered up to that time. In an official announcement it is stated the office will remain open until 10 p.m. Saturday night next, Aug. 22.

Special Session of Alberta Legislature Opens August 25

Sitting Promises to be Brief But Lively; Drouth Problem Likely to be Most Important

LIVESTOCK FEEDERS HOLD MEETING

Notwithstanding some monetary losses which had been sustained last year, we will carry on," was the decision reached by the Central Alberta Livestock Feeders' Association at a shareholders' meeting held in the Town Hall on Saturday afternoon last.

Fred Newcombe, District Agricultural addresser at the meeting, suggested the possibility of the association advancing sufficient money to purchase 40 or 50 uniform calves, to be loaned or sold to members of the Red Deer and Lacombe clubs. The meeting was unanimously in favor of the scheme, if it met with the approval of the calf club members.

H. G. Miner, a large rancher from the Medicine Hat district, intimated he would supply the necessary calves at a reasonable price, to be paid for when the calves were sold. Dr. Gray, president of a large Wyoming bank, gave an interesting talk on cattle feeding in that state. President R. A. Van Slyke, Red Deer, presided.

In the morning the vice-regal party went to the Parliament Buildings and received loyal addresses on behalf of the province by Premier William Aberhart, and of the city by Mayor Joseph Clark. In reply to the Premier's address, Lord Tweedsmuir brought a smile to the faces of the audience by saying: "I have been so impressed with the words of your province's resources that I feel like visiting your distinguished example, Mr. Premier, and issuing a Prosperity Certificate to Alberta."

The afternoon vice-regal party attended a gathering of citizens on McDougall Drive, where before 5000 citizens the Governor-General unveiled the city's new cenotaph, with appropriate ceremonies. In the evening a dinner at Government House and a public reception at the Legislative Chamber completed the day's program.

In the second place, registration for Social Credit divisions began at Edmonton, with both the opposition and the government claiming satisfaction with the result. Well over 50 per cent of the number on the voters' list took the forms, and the officials working on the registration, but the official figure of the number signing them for a day or two.

The circulation of Prosperity Certificates has also finished its first week and it is estimated that over 50 per cent of the number on the voters' list took the forms, and the officials working on the registration, but the official figure of the number signing them for a day or two.

DIRECT RELIEF IS REDUCED

Reduction in direct relief to municipalities throughout the province has been made by the Alberta government, effective from July 1st, according to word sent out by A. A. Mackenzie, Commissioner of the Relief and Public Welfare Bureau, which reads as follows:

"Consequent upon the reduction of the Grant-in-Aid made to the Province of Alberta by the Federal Government, effective July 1st, from and after that date, the percentage payable by the Province to municipalities has been reduced to 61 per cent of the gross expenditures for direct relief. Indigent municipalities, for which the Government is paying the full amount of relief, will be debited with their share, or 39 per cent of the gross amount of direct relief issued. This grant does not apply to medical or indigent relief, which remains wholly a municipal responsibility.

"It is desired that all municipalities will maintain a careful check on all relief residents and only issue relief to those who can satisfy the Council that necessity actually exists, due to no employment being available, and that the applicant is

unable to provide for himself, due to no fault of his own.

"Municipalities may require the recipients of relief to give work to the municipality in return for the gross amount of relief received, without any obligation of the municipality to the Province, and it is suggested, when possible, that municipalities insist that the recipients of relief give work in return for the full amount of the current month's relief, before the succeeding issue is made. An hourly rate of pay may be determined by the Council. It is usual that such rate conform to similar work being done by the municipality."

WHEN WORDS FAIL

The golfer stepped up to the tee and drove off. The ball sailed straight down the fairway, leaped into the green and rolled into the hole. The golfer threw his club in the air with excitement.

"What have you suddenly gone crazy about?" asked his wife, who was trying to learn something about the game.

"Why, I just did a hole in one," yelled the golfer, a wild gleam of delight in his eyes.

"Did you?" asked his wife, placidly. "Do it again, dear. I didn't see you."

100 Years of Railway History Commemorated

The advance made in the 100 years of steam railways in Canada is graphically illustrated in the above layout. The old-timer is a reproduction of the first steam locomotive in Canada, operated in 1836. Beside her stands the gigantic streamlined "6400" of the Canadian National, the largest streamlined locomotive in the world. Both are taking part in the centennial celebrations of the opening of the Champlain and St. Lawrence railway. Engineers A. J. Shupler and G. F. Moran, both of whom have seen more than 50 years' service, are seen in the 21-foot full size model of Canada's first train. They are making a cross-country tour.

Sport-Scope

By JACK McCAUGHERTY

The eleventh Olympiad is now history. Last Sunday, Aug. 16th, brought to a close the Berlin games, which turned out to be one of the most successful of Olympic meets. Many Olympic records were broken, but the answer as to who is the winner cannot be given as there is no official Olympic scoring system. Nevertheless, Germany collected more team and individual triumphs as well as more gold, silver and bronze medals than any other country did—are they winners?

Do you know the placing in each of the 23 sports? Well, here is an unofficial standing (team placing in order shown):

Track (Men): United States, Finland, Germany, Japan, Great Britain, Canada.
Track (Women): Germany U.S., Italy, Poland, Great Britain.
Swimming (Men): U.S., Japan, Germany, Hungary, France, Great Britain.
Swimming (Women): U.S., Holland, Germany, Japan, Denmark, Argentina.
Rowing: Germany, Great Britain, U.S., Italy, France.
Wrestling (Free): U.S., Hungary, Sweden, Finland, Estonia, Germany.
Wrestling (Graeco): Sweden, Finland, Estonia, Germany, Hungary, Turkey.

land, Estonia, Germany, Hungary, Turkey.
Boxing: Germany, Argentina, France, Hungary, Italy, Finland.
Basketball: United States, Canada, Mexico, Poland, Philippines, Uruguay.

Weight-Lifting: Egypt, U.S., Austria, France, Czechoslovakia, Germany.
Mod. Pentathlon: U.S., Germany, Sweden, Hungary, Italy, Finland.
Polo (Pony): Argentina, Great Britain, Mexico, Hungary, Germany.

Shooting: Germany, Sweden, Norway, France, Hungary, Poland.
Cycling: France, Germany, Holland, Italy, Switzerland, Great Britain.

Canoeing: Austria, Germany, Czechoslovakia, Sweden, Holland, Hungary, Norway, Sweden.
Gymnastics: Germany, Switzerland, Czechoslovakia, Finland, Hungary, Yugoslavia.
Handball: Germany, Austria, Holland, Hungary.

Field Hockey: India, Germany, Belgium, France, Holland, Austria, Poland.
Water Polo: Hungary, Germany, Belgium, France, Holland, Austria, Poland.
Soccer: Italy, Austria, Norway, Poland.

Fencing: Italy, Hungary, Germany, France, Austria, Belgium.
Equestrian: Germany, U.S., France, Sweden, Poland, Holland, Romania.
Note: Only five nations competed in pony polo. Only first four places determined in handball, field hockey and soccer.

Working by points on the 10-5-4

2-2-1 basis, this gives: Germany 134, U.S. 77½, Hungary 44, Italy 35½, France 35, Sweden 30½, Austria 26, Holland 24, Great Britain 20½, Finland 17, Argentina 16, Japan 11, Poland 11, Switzerland 10½, India 10, Canada 9, Czechoslovakia 9, Norway 9, Mexico 8, Egypt 7½, Estonia 6, Belgium 5, Denmark 2, Philippines 2, Yugoslavia 2, Uruguay 1, Turkey 1, Romania 1.

Olympic Hi-Lites of 1936
There were 725,000 spectators at Berlin this year, twice as large as the number of witnesses at the Los Angeles games in 1932. For the first time, a Japanese won the marathon. Jesse Owens (U.S.) is the first Olympic track and field athlete to gain four gold medals since Paavo Nurmi in 1924. Incidentally Jesse's full name is James Cleveland Owens. The "Jesse" came from his initials, "J.C."

The collapse of Stanley Wooderson of Great Britain was a big surprise. Canada dropped badly this year—Even lost in the basketball final.

"When I was a boy," said a grey-haired physician, "who was in a reminiscent mood, 'I wanted to be a soldier, but my parents persuaded me to study medicine.'"

"Oh, well," consoled his sympathetic neighbor, "such is life. Many a man, with wholesale ambitions has to content himself with a retail business."

The World of Fact and Fiction

By ART

The demand for new books always increases in the Fall and I find that the Lacombe Public Library is well prepared to meet this demand with a supply of reading matter fresh from the presses of many publishers. I have not read any of the newest of them so far, but they present an inviting array.

"Whiskey Trail," by George W. Ogden, is a story of an historic road in Kansas which appears to contain some fine reading. Then there's a modern love story by Sylvia Thompson, "Third Act in Venice," centering around one of the English nobility who is long on title but a little short on cash. (A common predicament nowadays).

"Advice Limited" is a new yarn by the maestro of mystery, E. Phillips Oppenheim. In the same vein is "The Case of the Sleepwalker's Niece," by E. S. Gardner.

If you are from the other side of the big pond you will appreciate that bright travelogue, "In England Today," by the late Larkin Johnston. His only other effort, "Beyond the Rockies," impressed me with its natural style and fine illustrations, and this new book appears to have these qualities. The beauties of the English countryside, its Tudor

castles and many other landmarks are pictured and described by Mr. Johnston in a manner which is sure to create a yearning for just one more trip to the "old sod."

Hoping to find something good beneath an old book cover last week, I chose "Slings and Arrows" by Hugh Conway. It turned out to be one of those old melodramas, at one stage of which the hero turns to his young (and beautiful) wife with, "Go, and may I never again gaze on your fair false face!" Let's give a thousand thanks that this style of writing has about disappeared.

Honey absorbs moisture from the air and loses aroma and flavor rapidly. Therefore, says the Dominion Apisist, honey should not be left uncovered any longer than is necessary.

Bruce MacMillan, M. L. A. Speaks in Church Hall

States "Function of Industry to Produce Goods, and Banking System Purchasing Power"

"The function of industry is to produce goods and the function of the banking system is to produce purchasing power," said Dr. Bruce MacMillan, M.L.A., as he first explained the Douglas theory and then showed how closely the new covenants followed this theory. Mr. MacMillan was speaking before a large audience in the Church Hall on Thursday evening, Aug. 13th.

The purpose of the government is to obtain a census of the production of the province, and upon the compilation of such figures, steps would be taken to furnish a dividend in the amount warranted. While he said Japan did not accept the Douglas theory in full, yet he believes the Japanese are able to undersell other nations in the world markets because they are paid a bonus by their government, which reimburses them for any losses incurred. The speaker mentioned Mr. Brownlee's advice to the U.E.A. to give their support to the government and also criticized Mr. Roper for the political game he is playing. Proceeding then to the registration forms, Mr. MacMillan read them clause by clause, clarifying each in turn.

Married Women Eligible
In Clause 3 of the Citizens' Registration Form, Mr. MacMillan said that married women of 18 years and over were eligible.

Clause B-2 was merely to assist in keeping the books of the Credit House in order. In the covenant, Clause 3, the words Claim and Demand were to protect the government from lawsuits, but there was nothing to prevent a citizen requesting payment in Canadian currency. Regarding Clause 4, he said that if everyone attempted to pay their taxes and arrears of taxes with Alberta currency, the government would be swamped, as at present they need currency to meet their outside obligations. In time they expect to accept Alberta credit on the taxes, etc.

Farmers' and Producers' covenant, Clause 1-C, just meant 50 per cent of such surplus as remained after his own needs had been met, and Clause D, to be ready to give such information when required by the government.

Visitors, he said, may register where visiting, but must give their own address. A husband and wife must both sign, otherwise it gives an opportunity for conniving for benefits without giving co-operation. Six thousand forms have been asked

for, for this constituency, and the registration office, in the old Comed Theatre, will be kept open until Aug. 22nd. A committee is being appointed to visit the business places in town and receive registrations. Establishment of State Credit Houses, he said, would depend upon the high or low registrations received at various points, but he believed one would be instituted at Lacombe. "Alberta Credit" was defined as being issued in the same principle as the chequing system in use today—that is, a pass book and non-negotiable certificates.

Describes Scrip
Speaking of scrip, Mr. MacMillan said it is a sort of intermediary between the system of today and the Social Credit plan when it is working. It is self-liquidating and gives purchasing power to many who cannot obtain it in any other way. The "terrible taxation" spoken of, he said, was not so terrible. On bonds on interest doubles the original cost over a period of 20 years, whereas in the scrip plan the principal itself is redeemed in two years.

On the platform with Mr. MacMillan was Norman Jaques, M.P., who claimed to be more convinced than ever that Social Credit is the remedy for economic evils. In the House, although many speeches had been made by Social Crediters, no criticism had been levelled at them and no attempt made to refute their arguments. At various centres where he has been speaking in the East he finds that people realize that some change is necessary and impending.

Says Banks Create Money
He had heard the Governor of the Bank of Canada reply, when asked if the banks create money: "Obviously"; then mentioning the amount on deposit compared to the amount in circulation, said: "Ten to one." Since banks create and destroy money at their pleasure it follows that they hold the lives of the people in their hands. The scrip plan has been suffering from a general policy of deflation. Budgets have been balanced by increasing the debt, which under the existing system is the only way they can be balanced.

During the election campaign, many people stood by Premier King because he promised to issue currency and credit in terms of the public need. Yet Mr. King's government turned down a proposal to pension Canada's blind persons and refused to lower the age requirement of old age pensioners to 60 because it was not financially desirable.

Referring to scrip, he said it is all a matter of changing the old man-made economic rules and conventions and playing the game to new rules, just as was done in the old type of whist, which has now evolved into auction and contract.

Should Back Government
"People who voted for this government should back it to the limit of their ability," the speaker concluded, amid hearty applause.

T. F. Roberts, chairman, said the Edmonton Journal had stated that he had endeavoured vainly to find several stores in Lacombe accepting scrip, which was a gross misrepresentation of facts. He had entered two places with the idea of seeing what would happen if he presented scrip.

In the first place, he had been offered change but had refused to change the scrip. In the second place he had put the scrip down on the counter and asked the proprietor what he proposed to do about it. Mr. Roberts said he had no intention of parting with this first piece of scrip, as he intended keeping it for a souvenir.

Several in the audience held up Prosperity Certificates and those who had not yet seen the scrip evinced much interest. It was announced that the annual picnic would be held at the W. Cranna farm, just north of town, on Thursday, Sept. 10th.

Bentley

BENTLEY.—Dr. Sam Leiske and family of Couer d'Alene, Idaho, are visiting relatives here. Mrs. Moore of Albert Lea, Minn., is visiting her son, Esco Moore, and family of Gull Lake district. She will remain for several weeks.

Born at Bentley Hospital on Monday, Aug. 17, to Mr. and Mrs. H. Kannelin of Belleville, a son. Miss Ruth Kay of Edmonton and Miss Esther Frederick of Bruderheim were over-Sunday visitors with Mrs. Leiske. Miss Suggett, who has been having holidays at her home here, returned with them on Sunday to her work in Edmonton.

Mrs. C. C. Reiswig of Harvey, N.D., is spending several weeks with her sister, Mrs. Reiswig, Sr., of the Durham district, and other relatives. She formerly resided here and will be remembered by many.

Social Credit Meeting
About 250 people were present at Bentley Hall on Wednesday evening last, when Dr. Bruce MacMillan, M.L.A. for Lacombe, and Norman Jaques, M.P. for Wetaskiwin, spoke. Mr. MacMillan's speech of over two hours was stated to be a review of the highlights of the last

session of the Legislature, information concerning negotiations between the Alberta government and Major Douglas and an explanation regarding the registration for dividends.

He defended the hiring of Mr. Major as financial advisor to the government; criticized Major Douglas for refusing to come to Alberta, saying the government had decided that if he (Douglas) was going to dictate to the Legislature he had best stay at home. Mr. MacMillan also scored the press, especially the Edmonton Journal, and the People's Weekly, together with its editor, Mr. Roper. He stated he hoped to have a State Credit House established at Bentley. Some 25 of 30 left the hall at the close of his speech.

Norman Jaques Speaks
Mr. Jaques spoke briefly of the last session at Ottawa and claimed there was no difference in the attitude of R. B. Bennett and Mackenzie King toward finance, and stated the S.C. party was not trying to change laws but rules. It was as easy to change the rules of finance as the rules of a game of cards. He ridiculed the opponents of S.C. by saying these self-styled superior people would be the laughing jackasses of

the earth when Alberta puts Social Credit over.

A good many anti-Social Crediters and a considerable number who were not British subjects were present. J. F. Miller presided.

A good number were in attendance at the regular meeting of the Garden Club on Tuesday evening, Aug. 11, when J. N. B. McDonald, Sr., of the Lacombe Nurseries, addressed the club on fruit raising and gardening. The club is filling a real need in the district and the meetings are instructive and interesting.

Hall visited the Chapel district, to the north of Bentley, on Sunday evening. The crop on the farm of Mr. Schuffelt at the northwest end of Gull Lake is reported a total loss while many others report 50 per cent damage or more. Bentley village escaped but the Rainy Creek district, southwest of Bentley, was also in the path of the storm.

Scrip appeared in the village last week and is circulating to a limited extent. Some merchants are taking it and will continue to do so if they are able to pass it on, while others are refusing to handle it at all. We expect to be able to report more fully on it in the course of a few weeks.

Registration for dividends is tak-

Revised Estimate of Argentina's Crop

The first estimate of the Argentine wheat crop of 1935 was 143,864,000 bushels. The final estimate was issued recently by the Director-General of Statistics for that country and the figures now are 139,460,000 bushels. When it is considered that 250 million bushels is not

an abnormal crop for Argentina, the effect of last year's drought can well be seen.

The bulk of this crop was sold to Brazil and the extent of the purchases of that country proved surprisingly large. This resulted in but little Argentine wheat entering the highly competitive markets of Europe and the Orient. The reason given for Brazil's large purchases was the trend in that country for farmers to go in for cotton growing and other forms of agriculture in preference to the production of wheat.

Special Harvest Selling of Lumber and Building Materials

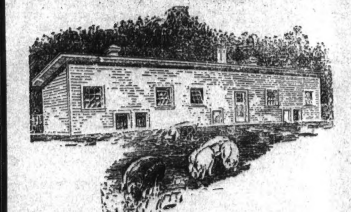

Our Yard and Sheds Are Well Stocked With the Lumber and Building Materials You Will Require for Your Harvest—and Late Summer—Building and Repair Jobs! We Have the Materials You Need! You Will Find Our Prices Reasonable! Come on in and Check Our Stocks! We Will Be Glad to Assist You All We Can With Your Building Problems! We Assure You of Service and Good Building Materials!

COMBINATION SUMMER AND WINTER DOORS

HOG HOUSES

Look after your Hog Houses. Put them in good repair. Give your hogs comfortable quarters. Thriving hogs mean good money for you.

There are many types of Hog Houses. We can advise you as to the construction of the types that meet all requirements—and at a minimum cost. We stock the materials you require.

MODERN INTERIOR HOME IMPROVEMENTS

There are many improvements you have in mind—For the Partry—Kitchen—Hall—and Living Room! We can have these Millwork Fixtures made for you right in our own factory, or you can make them right in your own home with select materials from our sheds.

We Specialize in Farm Buildings for the Farmer, Dairyman and Livestock Raiser.

GRANARY MATERIALS

We stock the best Skids—Joists—Flooring—Shiplap—Studding—Boards—Siding—Rafters—Thick Tongued and Grooved Lumber—and British Columbia Red Cedar Shingles.

We can fix you up with bone-dry materials that will assure you of grain-tight granaries.

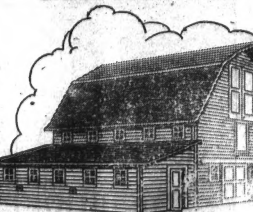

HARVEST SPECIALS

We are in a position to supply your needs for any Lumber Materials you require for—

**Bundle Wagons
Grain Tanks
Header Boxes
Loading Hoppers
Storage Tanks
Thresher Tanks
Hardwood Repairs**

Be sure you get your requirements from us. We stock the best. We can save you money!

BARN BUILDINGS

No matter the type or size of Barn you have in mind to build, it will certainly pay you to consult with us. Our trade knowledge and building experience is yours for the asking.

Buy your Lumber from Us and you are sure of getting the best that can be had for your money.

CEMENT, LIME, PLASTER and BRICK—for Foundations, Walls and Chimneys

Always in stock, and properly warehoused. Get your requirements at Our Yard, and be sure of a satisfactory job.

BRITISH COLUMBIA RED CEDAR SHINGLES

For the Best Roof Protection for Your Buildings—use British Columbia Red Cedar Shingles.

Put your Roofs in Good Repair now. Repairs made now will cost you much less than later on. Damaged Roofs deteriorate fast!

Don't put up with the inconvenience of faulty roofs, when necessary repairs can be made now at low cost!

POULTRY HOUSES

Improve your Poultry Houses! Keep them in good repair! If you Build New Ones, build them right! We can show you how!

We stock the right and best materials for permanent and movable houses. Good houses can be erected at extremely low cost. Don't neglect this sure source of revenue for you.

NEW HOMES—AND OLD HOMES MADE NEW

YOUR HOME IS YOUR CASTLE!

Make it a good one! Build it right! Buy your Materials from us!

Our Plan Books are at your disposal. In them you will find many pleasing designs and practical plans. We will be pleased to advise you as to cost.

Modernize With Lumber! Old Homes Can be Modernized — and at Low Cost! Old Homes Can be Made Like New!

Politics in Song

When they go into a political campaign in the States, they really go into it.
The Republicans have a campaign song, inspired by "Three Blind Mice." There is evidently no end to the number of verses that can be written to it.

Here is part of the song:

Three long years!
Three long years!
Full of grief and tears!
He took our shoes and he took our coat,
He got our shirt and he got our goat,
He took us to sea and sank the boat,
For three long years!
For three long years!
(Repeat three long years).

Roosevelt gave us to understand
If we would lend a helping hand
He'd lead us all to the promised land,
For three long years.
For when we got to the promised land
We found it nothing but shifting sand,
And he left us stripped like Sally Rand,
For three long years.
But the end has come to the evil day,
For the Grand Old Party points the way
To a really prosperous U.S.A.
Through all the years!

PHONE 122 LACOMBE

Only One Miss and This Lad is an Orphan

With unerring aim, Robert Foster, seven years old, of Sheldon, Ill., picks off birds which outline his father's figure against a target. The youngster's accuracy with a rifle, despite the fact that he has only five months' experience, under his father's guidance, amazes experts.

CROPS THAT WILL CONTROL WEEDS

Certain crops will control weeds effectively if every possible precaution is taken to insure a good stand. Barley, early maturing oats for grain and greenfeed, rape and cereals for annual pasture, grass and legume hay crops and fall rye are all crops which, if good stands are established, can compete with weeds if proper attention is given to soil preparation, choice of good seed and other good farming practices.

Observations made in supervising experiments at the Dominion Experimental Station, Lacombe, have shown that ploughing down weed seeds which are near the surface of the ground is a bad practice because it quickly results in land becoming so weedy that it is impossible to grow a clean and profitable wheat crop. It was also observed that if clean seed or barley, or an early maturing variety of oats for grain or greenfeed, is sown on spring ploughing delayed until weed seeds have been germinated, a reasonably clean crop can be produced on land badly contaminated with weeds. Weedy land to be used for these crops should receive shallow surface cultivation in the fall and spring in order to promote the germination of weed seeds that grew with the preceding crop and were distributed during harvesting operations.

Household Hints

By MRS. MARY MORTON

Menu Hint
Liver and Bacon Boiled Potatoes
Cabbage or Lettuce and
Onion Salad

Maple Rice Pudding—Tea or Milk
"How do you cook liver?" asks the new bride in our office. "Huh—his fond of liver. He wants it fried." "Well," says I, "if you have calf's liver you need not parboil it unless you wish. Beef's liver you had better wash, put in the frying pan, cover with cold water, let it come to a boil, then take the liver out, dry, dip in flour, season and fry. Calf's liver you can wash, dry, flour, season and cook in the bacon drippings." It's maple syrup time, and how good the syrup and sugar tastes. This maple rice pudding is good. Half will be plenty for a small family, as this recipe serves eight. In case you do not know, about three-quarters of a cup of raw rice cooked in a quart of bristly boiling water, will make the two and one-half cups cooked rice demanded by the recipe.

To-day's Recipes
Cabbage or Lettuce and Onion Salad—Slice onions on lettuce or shredded cabbage and serve with French or boiled dressing.
Maple Rice Pudding—Two and one-half cups milk, three eggs, beaten; one cup maple syrup; one-half teaspoon salt; one-half teaspoon nutmeg; one cup raisins. Combine all ingredients and blend thoroughly. Place in a buttered baking dish and bake at 350 degrees for about 45 minutes. Serve with custard if firm. This dessert may be served either hot or cold, accompanied with cream. Serves eight.

Tape Replaces Tacks
No longer is it necessary to use thumb tacks to apply your shelf edging to kitchen or closet shelves. A narrow tape which is adhesive on both sides replaces them. One side you apply to the shelf, leaving the other for the decorative edging. Simply press the edging against the tape, and it will adhere immediately. Also, you can rip it off if you want to put on a different color, or if you are moving to another house.

Fertilizers and How To Use Them

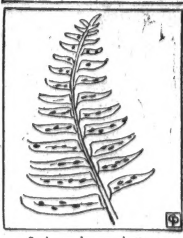

The primary function of commercial fertilizers is to furnish in available form one or more of the three elements of fertility, nitrogen, phosphoric acid, and potash. To predict with a fair degree of precision the amount of these elements necessary to apply to the soil to produce maximum yields is, states C. H. Robinson, Dominion Chemist, an extremely difficult matter. Factors, such as texture of the soil, available plant food already present in the soil, previous manuring and cropping, treatment of soil reaction, climatic conditions, and drainage, may affect the results obtained from the application of the added fertilizing constituents.

Will Produce Heavy Crop
Land which has received shallow surface cultivation in the fall and spring, and is ploughed the first week in June and kept tilled until the middle of June and then seeded with alfalfa, sweet clover or any of the numerous grass and legume hay or pasture mixtures, will produce a hay crop so heavy that weeds cannot compete with it. Repeated cutting, such as given alfalfa, will reduce the vigor of persistent perennial weeds such as Canada thistles.

Winter rye, seeded on land that has been summer-fallowed until August, or even stubbed in before Sept. 15th following an early maturing grain crop, will develop such an early rank growth that even our worst perennial weeds are largely smothered.

An annual pasture of two bushels of oats and one bushel of winter rye per acre, or a seeding of two to four pounds of rye in 36-inch rows, when grazed with live stock, will leave the land cleaner than it was before the crop was grown.

Good Gardening

Scale on house plants

Scale insects may be planning an attack on your favorite rubber plant, ferns or any other sturdy plants you may have in your home. Scale insects will be found along the branches and the undersides of the leaves, as shown in the above Garden-Graph. They are usually quite noticeable along the veins of the leaf. Study the Garden-Graph carefully and then examine your house plants to see if they are infested. Scrub any infested plant with a mixture of one-fourth ounce of white oil soap dissolved in a quart of water. Scrub the foliage and branches until the scale loosens and falls off. After this treatment give the plant a cold water bath to clean the whole oil solution out of its pores.

Quips and Quirks

JUST MUSIC
Willie's father picked up a very much scribbled piece of paper. It contained the words, "Blow blow draw draw blow draw blow." "What's the meaning of this?" the father demanded.
"Oh, that's music for my harmonica," explained Willie.

When the congregation knelt to pray, the little fellow on his first attendance asked: "What are all the people doing, mummy?"
"Shush! They're saying their prayers."
"What?" exclaimed the nipper, incredulously, "with all their clothes on?"

HECKLED
The new assistant at the seed shop was having a harassing time. Someone had ordered a packet of potato seed, and he had spent two hours looking for them, without success. At last he asked the boss about them.
"What?" roared the boss. "Potatoes are not down from seed. You've been having your leg pulled."

Ten minutes later a customer entered the shop and asked for some bird seed. To his surprise the assistant wagged a finger at him.
"Go on," he said. "I can't be fooled twice. Birds are hatched out of eggs, not seed."

An old lady who could not see eye to eye with the taxi-driver on the question of fare, finally remarked: "Don't try to tell me anything, my good man. I haven't been riding in taxis for five years for nothing."

"No," replied the driver, "but I bet you had a good try."

A dear old Scotch professor was left a widower. Not very long after he suddenly announced his intention of marrying again, half apologetically adding: "I put on my clothes and came down to the office."

Father: "Why were you kissing my daughter in that dark corner last night?"
Flaming Youth: "Now that I've seen her in daylight I sort of wonder myself."

"You look all in today, Bill. What's the trouble?"
Bill: "Well, I didn't get home until after daylight, and I was just undressing when my wife woke up and said: 'Aren't you getting up awfully early, Jim?' I put on my clothes and came down to the office."

(SHAVE UP!)
"My shaving brush is very stiff," complained Dad. "I wonder what's wrong with it."
"I don't know," said wife. "It was nice and soft when I painted the bird cage yesterday."

PAGE GRACIE ALLEN
The story is told of two Irishmen who, after fishing all morning, got some splendid strikes just before lunch time.
"Now then," says Mike, "mark the spot and we will come back."

While eating their lunch on the shore, Mike says to Pat: "Are you sure you can find the place again?"
"You bet I can," says Pat. "I cut a nick in the boat."

"Now I know you're dumb," says Mike. "How do we know that we are going to get the same boat?"

SAFETY FIRST
Man (to neighbor painting his fence): "Are you going to put a 'Wet Paint' sign on your fence?"
Neighbor: "No, do you think I want to have fingerprints all over it?"

magnesium compound, such as ground dolomite or kieselite, overcomes the poor crop development brought about by an insufficient supply of available magnesium in the soil. A certain measure of success in the control of physiologic disorders of crops has been obtained by the application of trace elements, such as boron and manganese. Particular attention is being given to the use of small dressings of borax as a means of control of brown heart in turnips and crown rot of sugar beets and mangels.

May Affect Yields
In certain of the potato growing districts of New Brunswick it has been found that the addition to the fertilizer of a small amount of a

Wheat Carryover Away Down

The carryover at the end of the crop year on July 31 is put by
the Federal Bureau at 108,747,059 bushels, which is 94,525,957 bush-
els less than that of a year ago and the lowest since 1929.

Such a reduction in surplus changes the country's wheat posi-
tion entirely. A heavy demand for Canada's stock promises to
continue and is likely to be slackened only by offerings from the
Argentina and Australia when their wheat comes on the market
about the end of the year.

Hedging pressure should not be as heavy as in the past few
years and there is every reason to believe that the average price
now prevailing should be well maintained.

WESTERN CANADA PRECIPITATION MAP

SHOWING PRECIPITATION FROM JULY 15 TO JULY 25TH, 1936
AS COMPARED WITH THE AVERAGE OF 10 YEARS OR MORE

The Rainfall Map shown above, which has been compiled and charted by the Research Department of the Seale Grain Company, Limited, and based upon reports from 270 rain gauge stations, indicates the percentage of the normal amount of rain that has fallen in the different districts and areas of Western Canada from April 1st to June 24th inclusive.

Memorial Unveiled
to "Kootenai" Brown

The Canadian West has seen few more colorful figures than was that of John George "Kootenai" Brown, founder and first superintendent of Waterton Lakes Park in the Rockies in southwestern Alberta, to whose memory a cairn was unveiled and dedicated at Waterton Lakes on Sunday, July 5, of this year.

The story of his career is the counterpart of that of many an adventurous Englishman who departed the motherland to pursue a hazardous life in other lands. An Eton and Oxford man, Brown first became a gold seeker, cowboy and soldier of fortune in the early '90s in Frisco country. He first saw Waterton Lakes, then known as the Kootenai Lakes, in 1865, over 70 years ago. He and some companions, on their way over the mountains to Fort Edmonton, to wash gold from the Saskatchewan River, came upon the glorious site of Waterton Lakes, and Brown was so taken with the surroundings, which he said provided the answer to his dreams, that he settled down to spend the remainder of his days there.

Became First Warden

When in later years the area surrounding the lakes was created a national park, "Kootenai" was the first warden, then acting superintendent.

Together with his half-breed wife "Kootenai" lies buried on the shore of the lower lake. He was a picturesque character, with all the rough and ready ways of the pioneer, but with the pioneer's virtues of clean fighting and loyalty to his friends, and the readiness to face hardships.

The cairn to his memory was unveiled by His Honor Lieut-Governor Walsh and dedicated by the Lord Bishop of Calgary, in a public service in the park attended by many old-timers and others from the south country. Senator Buchanan of Lethbridge, Superintendent Knight and others gave addresses.

CREAM OF PEA SOUP

One pint of peas, fresh or canned; 1 quart milk or part milk and part stock; 2 to 3 tablespoons flour, 2 to 3 tablespoons butter, salt and pepper.

If fresh peas are used, cook with least possible amount of water until tender. When peas are tender take out half of them and pass remainder through sieve together with water in which they were cooked. There should be about a cupful of this liquid. Make a white sauce of the butter, flour and milk. Add the pea purée. Just before serving beat with

HOW'S BUSINESS

"Against an unpleasant background of drought, serious unemployment relief, political pandering and tangled finances, Canadian business activity steadily expands," says "Canadian Business" for August in its regular department, entitled "How's Business?"

"Most recent figures reveal the best conditions in six years, with our business index for June reaching a new high mark for the recovery movement."

"The July dry spell did most of its damage in the West and in Ontario. Quebec escaped with relatively little loss, while the Maritimes and British Columbia so far have not been affected. In fact, British Columbia is developing into one of the brighter spots on our business map."

All Countries Improve

"The forward surge in business volume is not confined to Canada. In all of the 18 countries reporting to the League of Nations, industrial production is higher than a year ago. Even more reassuring is the expansion in international trade, which is now clearly in evidence following three years of virtual stagnation at the low of the depression."

"In further confirmation of the improved situation is the rise in commodity prices. Our official wholesale price index—stimulated by wheat—has given signs of moving out of its rut. At the same time world prices are slowly reflecting gradual reduction in world stocks."

"All in all, we believe that the Canadian business man can continue to look forward to increased volumes. Signs of world recovery persist in face of unhealthy political developments. While it is these political shifts which germinate and intensify the forces which make for industrial and economic crisis, it is unwise and premature to accentuate them at this juncture."

Burden of Taxation

"The growing burden of taxation, for example, may hamper industrial revival in this country but it is not likely to cause a reversal in trade trends. Nevertheless, the increasing paternalism of our governing bodies will place an insupportable load on business when contraction again sets in."

"We emphasize this point because of the current tendency to confuse short-term and long-term influences in the business outlook. When conditions are improving, industry can be saddled with heavy burdens which, while sapping the foundations, may have no apparent or immediate ill effects."

an egg beater and add remainder of the peas and season with salt and pepper.

YOU ANSWER

"Daddy!" exclaimed the little boy.
"One more question, then," sighed the tired father. "Only one."
"How far is it," inquired the tot, "between to and fro?"

Special Session of
Alberta Legislature

(Continued From Page One)

Aug. 25th the government's program will be ready. There are three important matters of business to be dealt with. The death situation and a solution for the problem it presents is the most important. Then there is the amendment of the Social Credit Measures Act, passed at the last session, to meet new factors in the government's program. It is thought that these amendments will remove the difficulty caused by the recent injunction taken against the City of Edmonton to prevent it handling the Property Certificates in connection with relief.

The government evidently expected such a move and has been preparing to meet it in the new legislation to be introduced. The cabinet looks upon the injunction as "only temporary."

Some action will also be taken in the direction of amending the Debt Adjustment Act. There have been rumors that the effort will be made to stop the plan of financiers to withdraw capital from the province, and a moratorium on general debts and mortgages has been suggested as likely, but the government has not given any indication of what its plans are in this regard. The session promises to be brief but lively. Government officials hope it will last only one week, but

(that will pretty much rest with the opposition and how it receives the legislation to be considered. Social Crediters in the House have agreed to do only what speech-making is absolutely necessary so as to expedite the business before the House.)

G.M. Executive Has 20 Years Service

C. E. McTavish Tells of Changes in Car Industry Since 1916

OSHAWA.—The sales objective of the Canadian automobile industry hasn't changed in 20 years. It is only the size of Canada's motor car fleet that has changed. But there has been great progress in the product and in sales methods.

The experience of two decades is summed up thus briefly by C. E. McTavish, general sales manager of General Motors Products of Canada, Limited, who recently celebrated the completion of 20 years' service with the company. Today, as he begins his 21st year in the automobile business, "Charlie" McTavish is still a youthful personality, with an enthusiasm for his job and a cordial word for those who work with him. An old-timer as automotive executives go, his record extends back even beyond 1916, to years of service in the carriage trade, training ground for so many good men in the motor business today. He was one of the steps of the upward ladder, from office boy to Canadian sales chief. Like many another prominent motor car man, he hailed from Ontario, Flesherton being his home town.

Years of Service

Long service with the company is a characteristic which he shares with many of his associates. President R. S. McLaughlin is in the lead with 48 years. Harry J. Carmichael, vice-president and general manager, is just entering his 25th year, some of this period being with McKinnon Industries before it became part of General Motors Corporation.

"When I joined this firm as Western Canada manager for Chevrolet in 1916," explained Mr. McTavish, "there were only 123,000 motor vehicles registered in the whole Dominion, whereas today there are 10 times that number. Yet our aim as salesmen today is exactly the same as it was 20 years ago, namely to supply enough cars—built by Canadians for Canadian conditions—to keep the Dominion's transportation fleet operating at normal."

"We are not trying to see how quickly we can reach the 'saturation point'—they were talking about

At the present Low Prices we are able to sell Studio Lounges and Davenport sets as low as \$42.00. Better ones at \$38.00, \$42.00 and up to \$65.00, in lovely Velour Coverings. —Lacombe Furniture Store.—Advt.

that in 1936, too—but rather we are concentrating on the country's logical needs, in order that production may have balance and stability. The fewer the ups and downs, the better the public will be served."

Greater Value Now

The public is getting a lot more car for its money than when he started in the selling game, Mr. McTavish declares.

"Back in 1916, a customer in Regina would have to pay about \$700 for a Chevrolet four-cylinder touring car. Today for that sum, the factory lists a sedan, with six cylinders, steel turret top, safety glass and dozens of other items which even the most expensive cars of 1916 could not boast. The reasons for the improvement are two: first, increased volume; and second, the tremendous advance in research and factory methods. There were 6200 Chevrolets sold in Canada in 1916; already in 1936, domestic shipments are over three times as great as that."

The automotive sales organization has travelled a long way since 1916.

A Business of Its Own

"There was practically no used car problem in those days. Nearly every sale was a 'straight deal'. There was, on the other hand, a big service problem, because dealers were still trying to sell cars as a side-line, and well-equipped service floors were few and far between. We have changed all that. The retail car business is today a business in its own right, and a big one. Factory-trained mechanics, and modern equipment, are to be found in dealer premises everywhere."

"Are Canadians buying as many cars as they should?" "Not until they buy 100,000 a year, and we are still a little under that. It takes that many to take care of obsolescence here. By that I mean not the merely worn-out cars, but the actually worn-out, the kind that paralyze traffic and take an untold accident toll."

"What are the 1937 prospects?" "Excellent, I would say," Mr. McTavish concluded, "still better motor cars, more Canadian than ever, and more Canadian buying power to keep the factories busy."

THE CHURCH MILITANT

A bishop was invited to dinner. During the meal he was astonished to hear the little daughter of the house state that a person must be brave these days to go to church.

"Why do you say that?" said the bishop.

"Oh," said the little child, "I heard papa telling mama that last Sunday there was a big gun in the pulpit; the canon was in the reading desk; the choir murdered the anthem, and the organist drowned the choir!"

Ontario Cow Has Triplet Calves!

By Central Press Canadian
ST. THOMAS, Ont., Aug. 19.—Triplet calves born to nine-year-old Holstein cow named Daisy, on the farm of John France, four miles northwest of here, on the night of May 30, are thriving and healthy and the mother is progressing as though the multiple birth had been no more than just one calf. The freak of nature which puts the cow in a class by herself was unexpected and resulted in birth of three perfectly normal calves, two bulls, one female. They are cross-bred, the father being a purebred Polled Angus bull owned by Clarence A. Boughner, Talbotville, named Premier of Alloway 4th, which he purchased from McEwen and Sons of London, Ont.

Born in Pasture

The calves were born during the night of May 30-31 in an open pasture when temperature records in this district indicated a low of 36 degrees Fahrenheit. No assistance was rendered the mother cow, and the calves were found on Sunday morning when Norman France, son of the owner of the cow, went to the pasture to bring in the herd for milking. Neither Daisy nor her offspring have shown signs of suffering from exposure. The calves each weighed about the same, an estimated 60 pounds apiece.

Veterinarians and cattlemen in this southern Ontario dairy district know of no other triple-births in cattle having occurred since the Chicago World's Fair in 1893, when a cow being shown there gave birth to triplets, one of which died shortly after birth. The accompanying pictures were taken on the morning after the calves were born. Daisy has borne 11 calves now, the present set of triplets, two of twins and four others that came one at a time.

Children Enjoy Camp at McLaurin Beach

McLAURIN BEACH.—Ninety-six happy children are enjoying 10 days' camp here under the auspices of the Canadian Sunday School Mission. Seventy-nine of these are children who have qualified for the free holiday by learning the required number of Bible verses, which is 350 the first year and 250 the following years. In addition to these there are 17 who qualified at the Calgary Evangelical Band under the leadership of Miss Rogers. When 25 workers and others who, while not being entertained by the mission but who are here to attend their meetings, are included, the number is brought up to more than 150.

The camp is under the supervision of Mr. and Mrs. E. Silversides of Three Hills, with Miss D. Thomas as secretary. Three Hills is the Alberta headquarters of the mission, whose main headquarters are at Winnipeg.

Three children are here from Saskatchewan. They qualified for a camp but as there was no camp in Saskatchewan this year, they were sent here. Children came from as far south as Medicine Hat and as far north as Barhead. The children from the south are especially delighted with the green grass and trees.

The children are put up in cottages, huts and tents and are fed in the large dining room belonging to the Baptist Assembly. The labels are set for 14. The children are divided into groups and study separately, after which prizes are awarded the group or groups being able to recite the verses more correctly.

The camp opened August 3 and closed August 10, giving a day each for coming and returning.

Duck-Turkey and Streamlined Birds

Fashions in the size and shape of turkeys for the dinner table seem to follow in the wake of modish apparel. In the British market the trend is toward smaller turkeys; in Canada the big turkey with honest-goodness proportions hold sway while in Australia the distracted breeders are in search of a "streamlined" bird in order to satisfy the latest demands of romancers.

On this subject the Fish Trades Gazette of London, Eng., remarks: "Large turkeys for our (British)

trade are each year going out of favor."

"To meet the requirements of these days of apartments with small ovens, the Turkey Breeders' Association in Australia is in search of the 'streamlined' turkey. Experiments are being started in Sydney to breed a bird of shorter leg, deeper chest and broader back to fit an ordinary gas oven. The turkey should also be lighter in weight. The aim of the breeders is a turkey which will look something like a duck in shape."

BETTER THAN WALKING

Mr. Humby (after four months of unemployment): "What d'you think, lass? I've got a job as a postman." Mrs. Humby: "Now, isn't that fine? I'll be much better than walking about the town all day."

Records Preserve British Dialects

LONDON.—Actors and actresses called upon to take a dialect part will feel grateful to the British Drama League for their two years' work in recording on gramophone disks 24 English, Scottish, Welsh and Irish dialects.

Of course this number does not represent the total in the British Isles, for it is calculated by the Yorkshire Dialect Society that there are at least 100 shades of difference in that county alone.

At a demonstration of the disks Mr. Geoffrey Whitworth, a director of the league, told how the 24 dialects and their speakers had been selected. Each speaker had to be brought to London to the studios of the Columbia Gramophone Company, sometimes more than once.

Cockney Had Oxford Accent

One would have thought that a London cockney would be easily obtained, but at his first rehearsal he delivered his talk in a most correct Oxford accent. His education had taught him how to lay aside his normal speech and the microphone had taken the place of the schoolmaster.

Each of the speakers had to repeat a set "piece" comprising all the sounds of the phonetic alphabet. It was interesting to note the wide divergence in some cases, not only of pronunciation, but of the way the sentences would be twisted round to suit the speaker.

Following the set piece came items of stories and readings of the speaker's choice. It was an unusual experience to hear these dialects following each other and to realize the great difference between, say,

Devon, Yorkshire, and the Irish Free State.

Set Presented to Museum
The 12 disks, having one complete dialect on each side, are put up in three albums of four each. Mr. Whitworth says that most of the speakers, especially those from the South, were agreed that dialects would in course of time die out, and that words and phrases remembered by the older people in their boyhood had even now become obsolete.

"ROSE MARIE" AT THE AVALON

The gifted quartette who piloted "Naughty Marietta" to unprecedented success—Jeanette MacDonald and Nelson Eddy, Director W. S. Van Dyke and Producer Hunt Stromberg—have again turned their talents to a giant enterprise, the production for Metro-Goldwyn-Mayer of the classic light opera, "Rose Marie," which is showing this week at the Avalon Theatre, for three nights starting Thursday.

One of the most successful theatrical properties extant, "Rose Marie" is known the world over. As a talking picture it was filmed almost entirely out-of-doors, in the gorgeous mountain-lake settings of the Sierra Nevada.

WASTED TALENT

Title: "This pie is baked to instructions. Didn't you cook to instructions?"
Lillie: "No, it's my own cremation."

Exports of Canadian cattle to the United States in 1936, up to April 30, totalled 75,826 head, compared with 58,112 in the corresponding period of 1935.

WHEAT SITUATION IN CANADA

The consensus of opinion of crop observers is that Western Canada's wheat yield will be around 200 million bushels this year. Carryover figures total approximately 130 million bushels in all positions. This gives a total of 330 million bushels as the prospective supply in Canada (outside of the small winter wheat areas in the east) for the current crop year.

Domestic requirements of wheat are always over 100 million bushels.

As the United States is expected to take 40 million bushels of this volume, 150 million bushels will be available for overseas exportations.

In view of the fact that world wheat production is down from last year, wet harvests in Europe are causing damage and Russia is suffering from drought, enlarged trade over last year may reasonably be anticipated. Canada exported 243 million bushels last crop year and should have little trouble exporting 156 million this crop year, particularly as there will be no keen competition until the first of next year.

Cattle Stricken as Scorching Sun Withers Pasture Fields

Despite the "permanent waving" of pastures and many other precautions, the states and provinces of western United States and Canada are in the grip of a prolonged dry spell. A burning sun is parching thousands of acres of grain and pasture, and cattlemen are forced to drive their stock miles for water.

Farewell Party to Mrs. R. H. Watson

Surprising Mrs. R. Watson, who is moving to Calgary, members of the Women's Social Credit Group foregathered at her home on Thursday, August 14th, both as a farewell party in her honor and to hold their regular meeting, which they advanced a week earlier for this purpose.

Mrs. Watson was presented with a clock scales, the presentation being made by Mrs. T. F. Roberts, who spoke of Mrs. Watson's splendid activities in connection with Social Credit—she has been secretary of Group No. 1—and also expressed the good wishes of the members.

Vice-President Mrs. W. Cranm, occupying the chair, called on Mrs. J. Lamont for a report of the S.C. convention, held on Aug. 29th. Mrs. Lamont's report was nearly as inspiring as the convention and brought out several highlights, as follows:

Mayor Jones Speaks
The address of welcome was delivered by Mayor E. H. Jones, in which he declared our government is striving to blaze a trail through the treacherous jungle of finance and organized big interests, to reach the peaceful valleys of co-operation and the Golden Rule as interpreted by the scientific application of Social Credit, and that the steady, patient, constant support and loyalty of the people for whom the struggle is being waged is needed. Alberta's Aberhart, he said, is a man in whom implicit trust can be placed, and thrust home the realization of how singularly the citizens are blessed in having such a brilliant, able and God-fearing man as leader. He expressed himself as being hostile to the unfair and often unscrupulous criticism levelled at the government and believed that if the citizens fulfilled their obligations Social Credit would be a success.

Reviews Government Activity
Ever since the convention, many complimentary remarks have been heard concerning Lacombe's M.L.A. Bruce MacMillan, who presided at the evening meeting, and on all sides are heard expressions of confidence in his ability and judgment. Mr. MacMillan's address in the afternoon was a resume of the difficulties met by the government, with an empty treasury, misleading press reports and many financial obligations to be met. He told of the legislation passed and steps taken to assist them in instituting Social Credit.

Mrs. Lamont was given a hearty vote of thanks for her splendid report. Some discussion ensued regarding registrations, which opened on Friday, Aug. 14th, and continues for one week, in the old Comet Theatre building. Volunteers were called for to assist in this work and several names were handed in.

Arrangements were also made to hold the annual S.C. picnic, which it is expected will be held in the second week in September, depending upon when speakers will be available.

Some questions were prepared to be answered by Mr. MacMillan at the evening meeting, due to Mrs. R. W. Clarke and Mrs. L. Lamont was greatly enjoyed.

HAM CROQUETTES
Two cups of mashed potatoes, 1 tablespoon butter, 3 egg yolks, 1 cup cooked ham, cayenne, eggs and crumbs.
Mix potato, butter, yolk of two eggs and cayenne, beat until smooth, then set to cool. Chop the ham, mix with the other yolk, set on the stove for a moment, then turn out to cool. When thoroughly cool, take a teaspoon of the potato mixture, make a hole in it, put a large teaspoon of the chopped ham inside, close the hole and shape into a ball. Dip in flour, then in egg, roll in crumbs and fry in deep fat.

CHRISTIAN SCIENCE
At all Christian Science churches, next Sunday, the subject of the Lesson-Sermon will be "Mind." The following is one of the Scriptural quotations contained in the Lesson-Sermon: "For the word of God is quick, and powerful, and sharper than any two-edged sword, piercing even to the dividing asunder of soul and spirit, and of the joints and marrow, and is a discerner of the thoughts and intents of the heart" (Hebrews 4:12). One of the corrective passages from "Science and Health with Key to the Scriptures," by Mary Baker Eddy, is as follows (page 393): "Mind is the master of the corporeal senses, and can conquer sickness, sin and death. Exercise this God-given authority."

Careless Motorists Cause of Numerous Crossing Accidents

Board of Railway Commissioners Sound Warning in Recent Report

"In many cases accidents at highway crossings are due to negligence of those driving automobiles and other vehicles and of pedestrians," according to a recent report of the Board of Railway Commissioners of Canada. Years of intensive study of the large numbers of accidents at level crossings have pointed the finger of blame largely at the motorists—with the warning that he should take advantage of protective devices.

There are many such accidents, although, happily, they do not always end fatally. The Board's report shows that the Canadian Pacific Railway, eastern lines, from Oct. 1, 1935, to March 31, 1936, had a total of 163 cases. The Canadian National Railway, from Nov. 1, 1935, to April 30, 1936, showed 53 cases where there was danger at protected crossings due to the negligence of those using the crossings.

Warnings Not Heeded

"Notwithstanding safety devices and cautionary signals," the Board stated, "people take chances and disregard safety. Motor accidents are becoming more frequent. Every sane motorist deplors this. If accidents are to be lessened, the sane motorist must educate the culpably negligent motorists, some of whose actions are recorded in the following list:

"Approached crossing at excessive speed and crashed through the lowered gates.
"Drove under gates as they were being lowered.
"Auto attempted to drive over crossing ahead of train.
"Truck driver deliberately disregarded stop signal."
In the report, which is concerned only with those crossings which are protected with gates and other safe-

ty devices, and which contained accounts of cases which resulted in minor damages to car or truck, but which might have ended fatally, reference is made to 216 cases. Of these, 54, or exactly one-quarter, were said to be the result of motorists driving through gates which were actually lowered at the time.

Drove in Front of Train
Thirty-seven took place because drivers disregarded warning stoplights and drove on to the crossing ahead of the train. Twenty cases were reported of motorists attempting to cross while the gates were being lowered, and an equal number of mishaps were caused by motorists being driven into the side of moving trains. Some cases were not caused by lack of caution, but because the vehicle was travelling too fast to give the driver time to act.

INQUIRY INTO WHEAT BUSINESS

Information from Ottawa intimates that Hon. Justice Targoon of Saskatchewan, the one-man commission appointed to inquire into Canada's wheat business, will commence his investigations very shortly. He will

be assisted by Hon. J. L. Ralston, K.C., of Montreal, as counsel.
The investigations will run the gamut of the wheat business from the farms of Western Canada to the consumers of Europe and elsewhere. Production, grading, transportation and marketing methods will be phases of the wheat business that will be examined. The commission will delve into the pros and cons of marketing and examine the method of selling by a Wheat Board and also the competitive method of the Grain Exchange.
The operations of the inquiry will be followed with keen interest by Western Canada, in particular, as wheat growing is the basic industry of this country.

You Can't Stay Where You Are

You turn through a kodak album and smile at old-style clothes. Skirts cluttering the ankles . . . hats perched high up on hair . . . wasp waists . . . awkward sleeves—odd how taste has changed.

Yet day by day your taste changes in all you wear and do. You don't like the same books, enjoy the same movies, choose the same underwear, prefer the same soap you did a short while ago. You are so used to the better, you wonder why you liked the old. Advertisements make you know the better as soon as it's proved to be better. They tell of good things accepted as good taste in the best homes. The hosiery, glass-curtains, lighting fixtures other moderns use; why their use is preferred. Advertisements influence so many around you, sooner or later you'll feel the change. Even if you never read an advertisement, you'll use in time some of the conveniences which advertisements urge you to use today. Advertisements form a tide of taste that sweeps you forward; you can't stand still. Since you'll enjoy what they advertise anyway, why not begin enjoying now?

DINNER STORIES

THAT WOULD BE BETTER!
The warden of a prison was inclined to overdo the facilities for enjoyment which he gave his prisoners. Despite numerous reforms, the convicts were still still satisfied.

"Say, you guys," he told them, smiling, "I've got you movies and beer and everything else I can think of. What do you want now?"
"Well, warden," said a voice, "what about a cross-country run?"

NOTHING'S RIGHT
"But, my dear," bleated the poor little hen-pecked husband, "you've been talking for half an hour and I haven't said a word."
"No," snapped the wife. "You haven't said anything, but you've been listening in a most aggravating manner, and I'm not going to stand for it."

Alberta Crop Report
States Harvesting General

Serious Feed Shortage in South; Central and Northern Crops Fair to Good

Harvest in general in southern and central districts and wheat cutting has commenced in northern areas and the Peace River district, according to Alberta Crop Report No. 4, issued by the Alberta Department of Agriculture, Edmonton, on Aug. 14th.

In the southern, and east-central portions of the province, no material change has occurred in the general crop situation. Conditions have continued to be extremely dry, the feed shortage becoming more acute as the season advances. Wheat yields in the dry area vary widely. The crop is a total failure in the more distressed districts, but yields of from 5 to 15 bushels are reported from many points, especially in the more western sections. Coarse grain yields in the south are exceedingly low and many fields have already been cut for green feed. Shortage of water is reported in the southern irrigation districts and even crops under irrigation have suffered to some extent.

Showers in Some Areas
From the Olds district north to the Edmonton zone, crops have had some benefit from scattered showers, and on the whole are somewhat more promising than formerly anticipated. At this report goes in press, rain is general in the Edmonton district and good showers are reported south to Calgary. Yields throughout this territory will range from light to average, both for wheat and coarse grains, depending upon prevalence of showers of the past month. Severe hail damage recently suffered in the Olds-Didsbury area, also from Lacombe west to Rimby, with lesser damage reported at other scattered points.

Conditions in the Peace River district continue to be very favorable. Harvesting of a good crop is just getting nicely under way.

Federal-Provincial conferences have been in progress during the past ten days relative to the stock and feed situation in the drought areas of the province.

The Summary
Medicine Hat—No rain since last report; wheat average under 5 bus. Feed situation serious.

Lethbridge—Harvest is well advanced, dry land yields exceedingly light, hay and grain under irrigation appear promising.

Cardston—Harvest general, yield wheat 4 to 5 bus. for total seeded acreage; average grade 3; feed situation grave; water damage was domestic and livestock.

Vulcan—Cutting general, fields patchy and wheat from 3 to 10 bushels; saving straw for fodder, serious feed shortage.

Brooks—Irrigation grain crops good but hay light. Good seed crop harvested. Little return from dry land crops.

Calgary—Wheat on summer-fallow up to 10 bushels, some higher. Coarse grain being cut for feed. Shortage of water for livestock. Feed supplies low.

Rockyford—Wheat harvesting is general, 5 to 12 bus.; some wheat and coarse grains cut for greenfeed.

Empress—Harvesting is general, yields 2 to 9 bus. and much acreage cut for feed.

Youngstown—Hailstorm on 8th severely damaged the little crop there was. Very little for feed.

Stettler—Wheat yielding 5 to 10

Goose Hangs High

A Mallard drake, its neck twisted between two telephone wires (third line from the bottom) gave Norman Colburn, Regina, mail delivery man, a chance to do a good turn.

Colburn saw the entangled drake six miles west of the city as he drove along on his rural mail route. He borrowed a farmer's long binder and tried the bird loose.

The farmer said the bird had been away in the wires, 20 feet above ground, for an hour.

has, on stubble, 10 to 20 on fallow. Coarse grains poor, some saw-fy damage.

Olds—Moisture conditions improved but hail damage severe south to Didsbury and east to Drumheller. Harvest well under way.

Red Deer—Wheat cutting general, average 11 bus., coarse grains improved with showers, patches of hail, no great surplus of feed.

Lacombe—Cutting general, wheat yield fair; severe hail damage this season at several points.

Vermilion-Lloydminster—Harvest general, wheat 5 to 10 bus. fair quality, coarse grains poor and some cut for feed, some feed shortage.

Willington—Cutting commenced; not well filled, hence yield reduced. Feed should be adequate.

Smoky Lake—Harvest general soon, wheat average about 18 bus. oats 40, barley 25, pasture good and plenty of feed.

Athabasca—Wheat cutting started, about 20 bus. and good quality. General crop prospects fair to good.

Grande Prairie—Harvesting started; good average crop, with wheat 22 to 25 bus.

Berwyn—Wheat cutting general and some barley cut. Conditions generally favorable.

An English confectioner offers caramels in a non-rustling wrapper. We are surprised that science bends no effort toward a silent peanut brittle.—San Francisco Chronicle.

"Nothing brings such contentment as a heart full of love," says a writer. What about a tank full of gasoline?—Detroit Free Press.

Meets Schmeling
At Olympic Games

Mr. W. J. McLean, Red Deer, Writer of His Experiences in Germany

An interesting letter has been received from Mr. W. J. McLean of Red Deer, who was one of the judges of the Olympic Boxing Competitions, recently held in Germany. Apparently Mr. McLean is enjoying himself and the Globe reprints his letter as follows:

Olympisches Dorf, den
July 30th, 1936.
"Did not write yesterday as it was a full day; could not well well being. The Judge and I went to a show which was held in a large theatre in the Dorf (village). There was a motley crowd there, people from about 40 or 50 countries. The Italians were the most jovial and noisy."

"Boulanger, the famous Austrian violinist, played six or eight times and it was wonderful. We did not have to pay, either."

"Got acquainted with some more outstanding athletes since I wrote last and watch them perform daily. It seems so simple. Schmeling, the great German fighter who beat Joe Louis, was on the grounds yesterday and Judge and I shook hands with him. As soon as the news spread, the athletes swarmed to see him. All the other famous athletes were forgotten—people are strange beings. It is reported that Schmeling is leaving for America next week."

Get Free Ride
"The Judge and I went into the city yesterday (by the way, we get in and out free and ride on public omnibuses for the same price). It seems strange and unfair. You will recall that I had a letter of introduction to the T. Eaton Co. in Paris,

Berlin and London. Well, we went there and met the manager. (They have only a purchasing center here). He was very approachable and expressed a desire for us to visit him again. We wanted to make some purchases as he sent one of the staff with us and we got some wonderful buys. Then returned to the village."

"After dinner some American, Canadian, German and Italian gathered at a broadcasting station (in the village). Two Americans were 'running the show'. Their leading man was a real organizer and broadcaster. He had several outstanding athletes there and would ask them questions. These athletes were Jack Lovelock of New Zealand, and Glen Cunningham and Ralph Metcalf of the U.S.A. and Dr. Peller of Germany. The questions and answers were, of course, broadcasted all over the world. Then the Italians and Germans each sang a couple of songs and we sang the Maple Leaf (you may not, however, detect my voice when listening to broadcast)."

Meets Autograph Hunters
"This morning we got up to bed, had breakfast and watched the athletes of the various countries go through their training. After dinner we went down to the village gate and outside. There are stores around the entrance and it trades some rich marks off for some various articles. There was a large crowd of people outside the gates. I had on my Olympic garb, Olympic emblem, etc., so a number of women and children, mostly children, came to get my autograph. Their number increased until I had to go inside the gates to keep from being overworked. Some of the little ones had cheap notebooks and others autograph albums made from ordinary scribbling books cut into pages about three inches by four inches and sewn together. All had their pencils but one little girl and I gave her one I had."

GOES TO VENTILION
Jack Grant of the Experimental Farm left on Monday with a shipment of livestock for Fort Vermilion.

ALL BRAN PASTRY
One-quarter cup of all bran, 1/4 cups flour, 1/4 tsp salt, 1/4 cup shortening, 5 tbsps. cold water (more or less).

Roll all bran until fine and combine with flour and salt. Cut in shortening. Add water, a little at a time, until dough is moist enough to hold together. Roll out on lightly floured board to about one-eighth inch in thickness. Yield: 1 two-crust pie or 2 eight-inch pastry shells.

If the \$2,000,000 rouble compact sold in the United States in a year were laid end to end, it would save dropping them in darkened movies. —Milwaukee Journal.
